

**Postdoctoral researcher positions** are open at Huazhong University of Science and Technology (Wuhan, China).

**Who can apply:** PhD graduates as well as PhD students who intend to gain their degree in 2021 or 2022. You should have decent background in the areas of automation, artificial intelligence or closely related fields.

The openings are at the Intelligent Manufacturing and Data Science Laboratory (<http://imds.aia.hust.edu.cn/English/Home.htm>). You will be conducting research related to AI and automation independently or as a member of a team. Research areas include but are not limited to control theory, control engineering, detection technology, system engineering, pattern recognition, intelligent systems, navigation, guidance and control. In addition, you will help tutoring graduate students and participate in other school affairs concerning research, teaching, social activities, etc.

The postdoc positions offer competitive payment and benefits, with annual income of 300 000 RMB (about 46 400 USD) before tax. The contract will last for two or three years with possible extension after performance evaluation. You are expected to start your work in 2022.

Applicants are encouraged to write to Prof. Hai-Tao Zhang ([zht@hust.edu.cn](mailto:zht@hust.edu.cn)) before **October 10, 2021**.
