

Contents

1. Mathematical theory of control processes	9
<i>Abbasov M.E.</i> First order minimization in nonsmooth analysis	9
<i>Egorov A.V.</i> Comparative analysis of numerical methods of the Lyapunov matrix construction for a scalar time-delay equation	13
<i>Zaranik U.P.</i> The Adams method for the construction of asymptotic stability domain for difference-differential equations	18
<i>Kuznetsova A.S.</i> Existence of the periodic solution of the motion equation of quasi-linear mechanical system with delay	24
<i>Lebedev D.M.</i> Modified method of support vectors	29
<i>Medvedeva I.V.</i> Inversion of the direct Lyapunov method in the stability analysis of systems with delay	33
<i>Mihev V.S.</i> On real rational approximations of analytic function on unit disk	39
<i>Morozov P.D.</i> Existence of periodic solution in nonlinear system with delay (central case)	43
<i>Ponomarev A.A.</i> Smith predictor in nonlinear case	47
<i>Sukach M.P.</i> Finding of minimal distance between a point and a convex polyhedron	53
<i>Tur N.S.</i> Recursive computation of the interpolation bivariate polynomial coefficients	59
<i>Firsov A.P.</i> Correction of moments of the Zubov approximating mixture	63
<i>Firyulina O.S.</i> Method for constructing maximal independent sets	68
<i>Chernuetsanu E.K.</i> Finding a hyperplane separating two polytopes	73
<i>Sharlay A.S., Alfeyorov G.V.</i> Robots and mechatronic systems	76
<i>Shakhov Ya.A.</i> The application of the Luenberger observer for a program motion stabilization of the quasi-linear time-invariant system ..	80
<i>Shchus A.N.</i> Development of the adaptive track control system based on the predictive control model	86
<i>Yakusheva D.B.</i> Boundary problem solution for nonlinear fixed controlled system of differential equations on infinite time interval with a discrete control	92

2. Mathematical methods in mechanics and physics	97
<i>Aminov R.M., Ovsyannikov A.D.</i> Modeling of discharge scenario and its development in the ITER tokamak	97
<i>Birukova E.S.</i> Analysis of galactic orbits chaos using the NAFF method	102
<i>Burdyugov A.V.</i> Modeling of parameters of the gases analyzer by collisional electron spectroscopy method, and basic scalings obtaining .	105
<i>Vasiliev A.A., Bedrina M.E.</i> Modeling of fullerene molecules and nanotubes filling with hydrogen	111
<i>Voloshin M.V.</i> Analysis of irreducible error of decision vector components for systems of linear algebraic equations	114
<i>Gabr M.V.S.O.</i> Wavelet decomposition of spaces of polynomial splines on a nonuniform mesh	119
<i>Golovkina A.G.</i> On the computation of axially symmetric magnetic system geometry providing the given charged particles motion	125
<i>Golubeva N.Yu., Starkov V.N.</i> Estimation of the orbits of flight of the space apparatus from Earth to the Lagrange points	131
<i>Grekov M.A., Zaichenko T.S.</i> Anticrack at the circular inclusion boundary	135
<i>Demchenko N.S.</i> Nyström methods analysis for solving of Schrödinger equation	141
<i>Dudoladova M.I., Starkov V.N.</i> Insolation effects on the phytoplankton and zooplankton evolution	147
<i>Ivanov V.A.</i> Stress intensity factors for interfacial cracks in an arc of a circle	152
<i>Kireyeva M.V.</i> An algorithm for construction an approximate solution of the uniform II-approximation problem on a given region	158
<i>Kitaygorodskaya T.M.</i> On the system of nested spase of spline on the uniform grid	161
<i>Kovalev D.A.</i> On a certain spline wavelet decomposition for Hermitian type	164
<i>Kosovtsov M.E.</i> Nonlinear dynamics modeling adjusted for particle spin momentum	170
<i>Kostyrko S.A., Vikulina Yu.I.</i> Stresses in a thin coating of a variable thickness	176
<i>Le Thi Nhu Bich.</i> Wavelet decompositions for model problems	182

<i>Matveeva N.N.</i> Mathematical modeling of diode system with different dielectrics	186
<i>Mikhhev R.U.</i> Wavelet decomposition on open and closed intervals	190
<i>Morozova A.Yu.</i> Finite element method in a curvilinear cylinder	193
<i>Ovod D.V.</i> On relaxation in smoothed field of stellar systems	199
<i>Raik A.V.</i> Modeling of intermolecular interaction potentials	205
<i>Salakhieva M.R., Starkov V.N.</i> Calculation of the time of flight with a solar sail to asteroids zone and to outward planets	211
<i>Sokolova O.B., Starkov V.N.</i> Temperature calculation into the surface layer with consideration of the cloudiness	216
<i>Stepanova V.A., Mansurova S.E.</i> Modeling of large deformations of an elastomeric layer	220
<i>Televniy D.S.</i> Modeling of triode electro-optical system	225
<i>Trofimov V.V.</i> Method of indirect measurement of low currents in emissive systems	231
<i>Ulanov E.A.</i> The Ferma-Torricelli-Steiner problem generalization	237
<i>Fedorov A.G., Antonova L.I.</i> On analysis of nuclear structure of thin metal films with the field emission spectroscopy method	243
<i>Chernyshev A.A.</i> «Russian sextuplet» optimization	247
<i>Shymanchuk D.V.</i> On possibility of construction of return trajectory in the neighborhood of collinear libration points L1 and L2	253
3. Mathematical models of medical and biological systems	257
<i>Ananjev K.I.</i> Optimization methods in identification and ranking problems	257
<i>Grishina A.V., Tokin I.I.</i> Construction of mathematical model of viral hepatitis type B and C according to results of liver biopsy	261
<i>Eremeeva E.V.</i> Application of the Kruskal-Wallis test to a certain genetic research	267
<i>Kaunenko T.I., Kolesin I.D., Svirkina L.A.</i> Model of the development of teenage subculture deviant type	271
<i>Kudryavtseva A.A., Masalov D.V., Svirkina L.A.</i> Systematically dynamic approach to distribution modeling of psychoactive substances addiction in teenage narcotic subculture	276

<i>Mamotsjov V.A.</i> A certain statistical approach to the classification problem	281
<i>Markov Yu.V.</i> Problem of population recognition in the n-dimensional space	285
<i>Nguyen Dinh Huyen.</i> Conditions of convergence of the discrete model of population dynamics	289
<i>Sokolov S.V.</i> Conditions of dissipativity of some models of population dynamics	294
<i>Stegalin I.S.</i> Cluster methods of optimization in identification and ranking problems	298
<i>Troyanozhko O.A.</i> Noise detection algorithm based on equivalent special methods in a medical database	302
Medical physics and information technologies	306
<i>Arlychev M.A.</i> Features of the software implementation of some modes of collection scintiscanner «EFATOM»	307
<i>Bazhukov A.V., Krivovichev G.V.</i> Numerical analysis of mathematical model of blood stationary flow	311
<i>Gordeev D.F.</i> Comparison of the photons doses, calculated by SCANPLAN and ROCS systems of radiation therapy planning	316
<i>Elizarova M.V.</i> Organization of data exchange within modern radiological facility	320
<i>Zhukov N.K., Mukhtarova D.Kh., Shestakov A.A.</i> Firmware realization of biometrical system of kinematical human step characteristics	326
<i>Kavrigin P.S., Mertz S.P., Nemnyugin S.A.</i> Geant4 and Fluka packages usage for hadronic therapy problems	332
<i>Lazareva A.V., Krivovichev G.V.</i> Mathematical modeling of blood flow in the part of stenosed major vessel	338
<i>Maximov K.M., Kotina E.D.</i> Optical flow usage for motion correction in radionuclide diagnostics	344
<i>Radichkina A.O.</i> Mathematical simulation of left ventricle during the systole contraction	349
<i>Ratkina S.V.</i> Mathematical modeling of blood flow in major artery	353
<i>Seleznyova N.A.</i> Mathematical modeling of motion of cervical spine in case of impingement attacks	357

4. Information and computer technologies	361
<i>Aleksanenkov A.A.</i> Computer simulation of the University business processes	361
<i>Anisimov D.V.</i> Deduction problem solution using DNA properties	366
<i>Balmyshev A.N.</i> Usage of semantic model of natural language in automated learning systems	372
<i>Bochkarev P.A.</i> Statistical algorithm for the Boolean data and its application in the Role Mining problem solving	376
<i>Wang Hongbo.</i> Synthesis of dynamic correctors for course stabilization accuracy increasing	381
<i>Glazova M.A.</i> Automatic marking of training set documents for the problem of name entities extraction	389
<i>Dolgopolik M.V.</i> Convex hull construction in arbitrary dimension space	394
<i>Drokin I.S.</i> Computer algorithms for ultrastabilization of LTI systems	401
<i>Durnovtseva S.A.</i> Computer modeling of a deep-diving vehicle dynamics under step disturbances	407
<i>Zhuravlev M.M.</i> Empiric approach to select of clusters number in the problem of identification of mechanical destructions of image	412
<i>Ivanov A.N.</i> Neural networks training problems in dynamic objects control and algorithmic foundation of its solving	418
<i>Ivanova O.A., Kudryashova E.A.</i> Analysis of SQL-Queries optimization in the Oracle DBMS	424
<i>Kanifolskiy D.S., Nesterov A.V., Nesterov S.V., Tsapov G.M.</i> On problems of numerical solving of the Cauchy problem with application of the linear automatic control system simulation in MATLAB	429
<i>Komlev S.N.</i> Methodology of the MATLAB software application to the C++ visual programming environment	436
<i>Korovin A.S., Korolyov A.I., Timoshenko D.M.</i> Algorithm of formative speech signal frequency finding	442
<i>Krivsov E.A., Kolpakovich K.Yu.</i> Method of optimization of modern ERP systems	448
<i>Martushov I.A.</i> Analysis of genetic algorithms	454
<i>Melnikov D.V.</i> Semantic transformation of natural language queries to relational structures	460

<i>Okunev V.V., Potapov A.S.</i> Prior estimate of block sizes influence on decoded image quality for fractal image compression algorithm.....	466
<i>Panov S.A.</i> Conception of construction of systems.....	472
<i>Petrov R.A., Fuks V.V.</i> Identification of features for news documents classification be means of the support vector method.....	478
<i>Savin A.V.</i> Identification and control of position of horizontal pendulum in real time.....	484
<i>Sarnatsky M.V.</i> Method of iterative adaptation of automatic speech recognition systems to a speaker.....	490
<i>Smirnov M.N., Fedorova M.A.</i> Computer modeling of the astatic stabilization system of sea-going ship course.....	495
<i>Spiridonov S.S.</i> Comparative analysis of calculation performance formulas between the program MS Excel and algorithm of dynamic forest.....	501
<i>Terentiev S.V.</i> On application of interval methods to the construction of pseudo-trajectories.....	506
<i>Urbanovich S.Yu.</i> XPath realization by means of monoid.....	512
<i>Shelabin D.A.</i> SGM-algorithm for moving object detection in video stream.....	516
<i>Hara T., Brine J.</i> Data mining techniques to evaluate use patterns of a learning management system.....	522
5. Control problems in social and economical systems	529
<i>Abdrafikova S.A., Garnaev A.Yu.</i> On choosing of licensing type for innovative technology sale.....	529
<i>Abramovskaya T.V.</i> On some differential games of pursuit.....	532
<i>Anisimov D.B., Orlov V.B., Petrova V.A.</i> Fuzzy theory in economics models.....	535
<i>Afanasyev V.I., Kiryanen A.I.</i> Probabilistic model of the Russian Federation budget according to Markov's discrete chains.....	541
<i>Afanasyeva E.V.</i> Probabilistic chains. Resource distribution modeling.....	547
<i>Baskov O.V.</i> Algorithm for sequential accounting of information on the relative criteria importance in the multicriteria choice problem....	553
<i>Bogdanova O.K., Parilina E.M.</i> Empirical analysis of social networks.....	559
<i>Bukholtseva A.A.</i> Modeling of macroeconomic relationships of a region based on the Input-Output equations.....	565

<i>Garaev I.A.</i> New effective method of derivatives dynamics estimations	569
<i>Dorofeyeva T.B.</i> Probability-statistical analysis of financial expenditure in medical insurance system in Saint Petersburg	575
<i>Zak M.M.</i> Algorithms of data classification based on decision trees	581
<i>Zakharov A.O.</i> Reduction of the Pareto set based on closed information on criteria groups.....	587
<i>Zemtsova V.N.</i> Generalization of the Sen and Schwartz theorems.....	593
<i>Zubareva M.L., Gubar E.A.</i> Routes optimization in the ATM network.....	599
<i>Izbitskiy D.V., Pristavko V.T.</i> Application of information technology to the region's tax basis dynamics modeling.....	603
<i>Izotov K.A.</i> Mathematical model of problem of employees administration.....	609
<i>Ilyina A.V., Kozlovskaya N.V.</i> Time-consistency of PMS-vector in emission reduction model	612
<i>Karaseva V.V.</i> Some approaches to the oil price modeling.....	618
<i>Kozlovskaya N.V.</i> Characteristic function super-additivity in the game theoretic model of territorial environmental production	623
<i>Konovalova M.V.</i> Variable selection in the linear regression model via the Bayes factor	628
<i>Koroleva A. F., Zenkevich N.A.</i> Differential game of advertising management on fashion market	632
<i>Kostenko N.M.</i> Methodological fundamentals of development of interactive system of making decision on tax rates choice.....	638
<i>Kostyunin S.Yu.</i> Core in one class of the dynamic NTU games	641
<i>Kostyunin S.Yu., Shevkoplyas E.V.</i> One modified game-theoretical model of pollution management.....	647
<i>Kumacheva S.Sh.</i> Application of the search theory to the problem of tax evasions searching	653
<i>Legotina Yu.V.</i> Application of predator-prey model to problems of analysis and control of social-economic processes of a region.....	658
<i>Litvin A.Yu., Pristavko V.T.</i> Matrix filtration of random sequences in one economic problem	662

<i>Mazalova A. V.</i> The equilibrium in Hotelling's model with the Manhattan distance	666
<i>Merzljakova Yu.D., Gubar E.A.</i> Cash flow forecast in the ATM network	671
<i>Minchenko S. V.</i> Matrix discrete filtration in trader problem	677
<i>Mikhaltsova E.I.</i> Methods of treatment effect estimation	683
<i>Petrov A.G., Slobozhanin N.M.</i> Analysis of potential function in the shortest-path problem	688
<i>Pristavko V.T., Svischikova M.V.</i> Encoding and decoding of the Gaussian vector signals	692
<i>Svyatukhina M.A.</i> Program realization of the SEM algorithm and its application to archeological data classification	697
<i>Sergeeva A.A.</i> Queueing model with good completeness rate	702
<i>Stinskaite L.V.</i> Optimal replacement policy for a system with obsolescence	707
<i>Sultanbekov A.A.</i> Dynamic models of portfolio problems	712
<i>Tur A.V.</i> The Yeung condition for linear-quadratic discrete-time dynamic games with incomplete information	718
