

CONTENTS

APPLIED MATHEMATICS

<i>Aleksandrov A. Yu., Kosov A. A.</i> On stability of gyroscopic systems.....	3
<i>Bregman K. M.</i> Differentiation algorithm based on the additional variables method.	14
<i>Dahl Yu. M.</i> About V. V. Novozilov's works on the theory of elasticity.....	26
<i>Ermolaeva N. N., Kurbatova G. I.</i> The analysis of the approaches to the modeling of thermodynamic processes in gas flow at hyperpressure.....	35
<i>Kalinina E. A.</i> On Hölder condition numbers.....	45
<i>Ovsyannikov A. D.</i> On optimization of charged particle dynamics in electrostatic field	54
<i>Ovsyannikov D. A., Edamenko N. S.</i> Modeling of charged particle beam dynamics..	60
<i>Cherneysanu E. K.</i> The method of gradient type for solving the problem of strict h -polyhedral separability.....	66
<i>Shymanchuk D. V., Shmyrov A. S.</i> Construction of the return trajectory to the neighborhood of the collinear libration point of the Sun–Earth system.....	75

INFORMATICS

<i>Amelin K. S.</i> Randomization in control loop for small UAV Fly optimization under unknown changes of wind direction.....	85
<i>Bogdanov A. V., Ye Myint Naing.</i> A comparison of several cloud computing platforms	102
<i>Durnovtseva S. A.</i> The synthesis method of seismic vibrations corresponding to a given family of response spectra.....	111
<i>Makarova M. A.</i> Spherical and cylindrical diodes modeling with the space charges effect.....	120
<i>Nikiforov K. A., Egorov N. V.</i> Simulation of emission processes in MATLAB.....	127

ANNOTATIONS.....	135
------------------	-----

ABSTRACTS.....	140
