

CONTENTS

Issue 1

Applied mathematics

<i>Aleshkov Yu. Z.</i> Applied mathematics of Vladimir Ivanovich Zubov.	5
<i>Dodonov N. Yu., Zhuk V. V., Hovanov N. V.</i> On a reconstruction of a continuous function with limited variation by its known values in a finite number of places.	15
<i>Zubov V. I.</i> H – century.	25
<i>Olemskoy I. V.</i> The method of the fifth order of Runge–Kutta type of the structurally divided differential equations integration systems.	39
<i>Mal'kov V. M., Mal'kova Yu. V.</i> Non-linear Flamant problem for Bartenev–Hazanovich material.	49

Informatics

<i>Bratchikov I.L.</i> Restricting Strategies of Logical Inference Search Based on Abstraction Method.	56
<i>Terekhov A. N, Sokolov V. V.</i> New trends of Real technology.	64

Control processes

<i>Adrianov A. A., Chistyakov S. V.</i> On a class of coalition-free differential games with infinite duration.	78
<i>Aleksandrov A. Yu.</i> On the stability of an equilibrium of nonautonomous oscillatory systems.	94
<i>Karelin V. V.</i> The problem of optimum control in Markov processes.	103
<i>Kharitonov V.L.</i> Lyapunov functionals with a given time derivative. I. Complete type functionals	110

Issue 2

Applied mathematics

<i>Aleshkov Yu. Z.</i> Wave motions of the fluid.	118
<i>Bochkarev A. O.</i> The nonlinear Kelvin's problem.	128
<i>Boure V. M., Kumacheva S. Sh.</i> The model of auditing with the use of statistical information of taxpayer income.	140
<i>Mazalov V. V., Peshkov N. V.</i> Asymptotic properties of optimal stopping time in the problem with non-zero cost for observation.	146
<i>G.I. Kolesnikov, N.V. Kornikova, Yu.V. Fedotov, N.V. Hovanov.</i> Stock-market dynamics alternatives' probabilities estimation under deficiency of numerical information. ..	151
<i>Smirnov A.N.</i> Volumetric scheduling-a basis of a operational planning	161
<i>Smirnov O. A.</i> Mass motion on the visco-elastic layer under nonstationary loading.	171

Informatics

<i>Men'shikov G. G.</i> Show oportunities of Babushka-Prager-Vitasek example in the point and interval computation.	179
--	-----

Control processes

Pristavko V. T. Continuous control systems with matrix variables. 184
Shmyrov V. A. Stabilization of the controlled orbital movement of a space vehicle in the neighbourhood of collinear libration point L_1 192
Kharitonov V.L. Lyapunov functionals with a given time derivative.
 II. Lyapunov matrices 199

Papers

Yu.P.Petrov (75-th birthday) 208
Memorial: Klimentii Feodosievich Chernyh 210
Conference "Control Processes and stability" 211
