

## C O N T E N T S

### Applied mathematics

<i>Aleksandrov A. Yu., Platonov A. V., Chen Y.</i> On ultimate boundedness of solutions for some classes of population dynamics models .....	3
<i>Barinov V. A.</i> Distribution of waves on free surface of viscous liquid .....	18
<i>Demjanovich Y. K., Le T. N. B.</i> Wavelet decompositions of Hermite type splines based on replacing of derivatives with differences .....	32
<i>Egorov N. V., Klemeshev V. A., Fomenko M. G.</i> Calculation of an electrostatic field diode emission system with the field cathode .....	39
<i>Kozlovskaya N. V., Petrosyan L. A., Iljina A. V.</i> Coalitional solution in emission reduction model .....	46
<i>Provotorov V. V.</i> Method of the moments in the problem of extinguishing fluctuations of differential system on the graph .....	60
<i>Proudnikov I. M.</i> Integral approximation of nonsmooth functions preserving local extremums .....	70

### Informatics

<i>Byrkov I. A.</i> SELEN software package for computer-aided development of mathematical models for power system simulators .....	84
<i>Kotina E. D.</i> Program complex "Diagnostics" for radionuclide research processing .....	100
<i>Okunev V. V.</i> On optimization of the fractal image compression algorithm .....	114
<i>Simuni M. L.</i> Specifications of refactoring system for sparse matrix processing software ....	123
<i>Terentiev S. V.</i> On optimization of implementation an algorithm of localization of dynamical system invariant sets .....	130

<b>Papers</b> .....	138
---------------------	-----

<b>Summaries</b> .....	143
