

C O N T E N T S

Applied mathematics

<i>Andrianov S. N., Artamonov S. A.</i> An optimal algorithm and programs for isochronic magnetic field designing on the base of static equilibrium orbits for accelerators with azimuth variations	3
<i>Erem'in A. S.</i> Modification of the theory of labelled trees for the structural method of solving systems of ODEs	15
<i>Kvitko A. N.</i> About one algorithm for solving a boundary problem for a nonlinear delay controlled system	22
<i>Korobeynikov A. I.</i> Comparison of parameter estimates for one special model of survival curves for sample with interval censoring	35
<i>Latypov V. N.</i> Automatization of solution of ordinary differential equations	48
<i>Makarov A. A.</i> One variant of spline wavelet decomposition of B -spline spaces	59
<i>Matrosov A. V.</i> A numerical-analytical algorithm of a method of initial parameters for the analysis of long bearm on an elastic foundation	72
<i>Ovsyannikov A. D.</i> Control of charged particles beam with consideration of their interaction	82
<i>Ossipkov L. P.</i> Stochastization in homogeneous graviplasmas	93
<i>Pronina Yu. G.</i> Concentrated forces and couples in an elastic half-plane with a hole	104
<i>Strokan P. V., Matsuhisa T.</i> Informational equilibrium in communicational systems	115
<i>Tulupyev A. L.</i> Probabilistic estimates consistency in conjuncts and disjuncts ideals	122
<i>Chashnikov M. V.</i> On the uniqueness problem of Lyapunov matrix: a multiple delay case	133
<i>Chashnikov N. V.</i> Composite parametric Coons patches	141
<i>Yumagulov M. G., Vyshinskij A. A., Murtazina S. A., Nurov I. D.</i> Operational method of research local bifurcations multipleparameter dynamic systems	146

Informatics

<i>Vassilieva N. S.</i> Bin width selection for color histograms in image retrieval	156
<i>Romanovsky K. Y.</i> Introducing reuse to phone exchanges family documentation by means of DocLine technology	166
<i>Sotnikova M. V.</i> Algorithms of marine ships routing taking into account weather forecast	181
