Applied mathematics

<i>Karelin V. V.</i> Exact penalty functions in the problem of supervision	3
<i>Kolesin I. D.</i> Maximum principle in organizing activity	9
<i>Krasnova A. Ju.</i> About one coloring algorithm of graph and its modifications	14
<i>Kurbatova G. I.</i> On solution methods of one stiff ordinary differential equations system	27
<i>Kurkin E. I., Shakhov V. G.</i> Boundary layer of axial flow around revolving axisymmetric bodies ..	38
<i>Mazalov V. V., Falko A. A.</i> Arbitration procedure in the m -person best-choice problem	50
<i>Mal'kov V. M., Smirnov O. A.</i> Perturbation method for research of earthquake-resistant structure problem on the base of multilayer rubber-metal bearings	58
<i>Pavlovsky V. A., Chechitova Yu. S., Chistov A. L., Parfenova N. N., Zemtsovsky E. V.</i> Mathematical modeling of the mechanical stress arising in functioning of asymmetric shutters of the aorta valve	72
<i>Pogozhev S. V., Hitrov G. M.</i> On Graph isomorphism problem and matrix algorithm of its solution	80
<i>Savitskaya D. V.</i> Normal form of (0,1)-matrixes and algorithms of its construction	85
<i>Chistov A. L.</i> Unified laminar turbulent differential model of incompressible viscous liquid flows...	99

Informatics

<i>Vasilyev P. K.</i> Using Gurevich abstract state machine language with time for specifying the IEEE 1394 Root Contention Protocol	103
<i>Grachev M. K.</i> Aspect.NET Framework and its application in journaling problem	115
