

## C O N T E N T S

### Applied mathematics

<i>Aleksandrov A. Yu., Buzlukova O. A., Kosov A. A.</i> On the maintainance of the equilibrium position stability of mechanical systems under the evolution of dissipative forces. . . . .	3
<i>Blagodatskikh A. I.</i> Pontriagin's problem with many players . . . . .	16
<i>Varajun' M. I., Antonov A. Yu.</i> Analysis of a stochastic discrete filter for noise reduction . . . . .	24
<i>Vinogradova E. M., Dolgov S. L., Egorov N. V.</i> Calculation of electrostatic potential in multi-tip and single-tip field emission systems. . . . .	29
<i>Vitashevskaja I. S., Olemskoy I. V., Hitrov G. M.</i> On some invariant of square $(0, 1)$ -matrices . . . . .	38
<i>Grekov M. A., Kostirko S. A.</i> Instability of flat surface of a film coating due to surface diffusion. . . . .	46
<i>Rogovskaya O. N., Kirpichnikov S. N.</i> Multyloops Impulsive Interceptions between Circular Coplanar Orbits. . . . .	55
<i>Tchobanov M. K., Karakazjan S. A.</i> Three channel multirate systems . . . . .	66
<i>Schennikova E. V.</i> Construction of connective estimations of linearization errors for multi-connected nonlinear systems . . . . .	76

### Informatics

<i>Korotkih D. A.</i> Methods of Test tasks analysis and knowledge evaluation . . . . .	84
<i>M. Naganov</i> Model transformation automation for the telecommunications management systems integration . . . . .	90
<i>Simanovsky A. A.</i> Simultaneous evolution of mutually dependent XML and relational schemas . . . . .	102

### From the history of science

<i>Polyakhova E. N., Kholshchevnikov K. V.</i> Several problems of applied mathematics – celestial mechanics, geodesy, and cartography – in the works of the academician Michael Ostrogradsky, and of his scientific school (to Ostrogradsky's Jubilee) . . . . .	113
